DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foreign Patent GB 339,680, issued to Batten (as listed on Applicant's enclosed, Information Disclosure Statement).

It appears that the reference of Batten discloses Applicant's wild bird accessory, including, inter alia, comprising a plurality of pots, and further comprising a flowerpot shaped bird accessory comprising a receptacle having a first end and a second end and a continuous side wall of the receptacle extending between the first end and the second end of the receptacle and having an opening therein.

With respect to the claimed limitations, of size changes to the opening on the accessory; material makeup being ceramic; the bottom being a bell pot; or the exterior surfaces of the device being waterproof, specifically provided with a silicone coating, at least on the exterior surfaces thereof, each of these listed modifications would have been obvious to a skilled artisan at the time the invention was made, since: 1) changing the size of bird feeder openings/dwellings is known in the art for various reasons, the most common being to accommodate larger birds or so as to prevent a certain size of bird from entering a dwelling; 2) With respect to the material makeup of the device, it has

been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

In re Leshin, 125 USPQ 416; and 3) it would have further been obvious to one of ordinary skill in the art to have treated the device with a weather proofing substance, such as silicone, since the major function of the device is to provide a dwelling for birds in the wild and such a modification would help to preserve the device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 2,715,386; 5,207,180 and D83,358.
